

Mike Nakamura Photography

Custom Prints

These are printed directly from your ready to print file. We will handle necessary interpolation and apply the appropriate output sharpening. You need to provide an image file which has tonality, contrast, color, etc. adjusted to your liking. It is recommended that a smaller proof print be made prior to any large prints.

All prints are made on an Epson Stylus Pro 7600 using pigment based Ultrachrome inks. See www.wilhelm-research.com for information on print longevity.

Introductory Prices

Prints on Photo Paper

<u>SIZE</u>	<u>QTY 1</u>	<u>QTY 5+</u>
